Towards resilient city region food systems
CITY REGION FOOD SYSTEM PROGRAMME

- City Region Food System programme of RUAF and FAO, supported by WLE aims to reinforce rural-urban linkages for more sustainable and resilient food systems
- Assessment PLUS evidence-based action planning
- Underscored by multistakeholder engagement and participation throughout
What is a city region?

- A larger urban centre – or conglomeration of smaller urban centres – and the surrounding and interspersed peri-urban and rural hinterland.
- An area in which flows of people, goods and ecosystem services operate across the rural-urban continuum.

What is a city region food system?

- CRFS approach advocates strengthened connectivity between urban centres and surrounding areas.
- Encompasses the complex network of actors, processes and relationships that are involved in food production, processing, marketing and consumption in a given city region.
- Includes the economic, societal, and environmental components that configure those actors, processes and relationships.
CITY REGION FOOD SYSTEM PROGRAMME

Phase 1: 2015 – 2018

Sustainable and resilient city region food systems

- Colombo (Sri Lanka)
- Utrecht (The Netherlands)
- Quito (Ecuador)
- Kitwe (Zambia)
- Lusaka (Zambia)
- Medellin (Colombia)
- Toronto (Canada)

**Quito**
2018: Signature of the Pacto Agroalimentario Quito
2020: Informed Covid-19 emergency food response

**Lusaka**
2020: Establishment of the Food Policy Council.
Part of Healthy Food Africa (with 10 other cities)
Phase 2: 2019 – 2021

Climate and pandemic resilient city region food systems

- Antananarivo (Madagascar)
- Colombo (Sri Lanka)
- Kigali (Rwanda)
- Melbourne (Australia)
- Tamale (Ghana)

Risk is the likelihood of damage or negative impacts or consequences
Kigali

- Under-use of risk sensitive practices like mulching and terracing, due to expense, labour required, and lack of knowledge (poor extension services)

- Poor transport infrastructure in some areas far from Kigali markets, impassable roads after heavy rains, increases risk of post-harvest losses.
CITY REGION FOOD SYSTEM PROGRAMME

Main products and future development with cities

Coming November 2021
